- Collection bucket with hydraulic opening and closing
- PPN brush
- N.3 support wheels
- Floating system for forks

The new sweeper bucket M3 F-series is suitable for forklifts and, generally speaking, for all machinery equipped with forks. It can be used in the industrial, agricultural and nursery sectors. It is operated only forward. Thanks to the quick installation, it looks handy and fast for the cleaning of every surface, from big industrial areas to yards, from roads and car parks to farms and riding schools. It is equipped with: collection bucket with hydraulic opening and closing, floating system for forks, three support wheels and PPN brush Ø 550 mm. (Ø 600 mm for BS240F).

OPTIONAL

	Sprinkler kit 100 / 200 L (only for BS240F), with electric pump and hose with nebulizers	Hose kit with nebulizers (for sprinkler kit with tank already installed)
Side brush r/l Ø 600 mm in polypropylene	Nebulizers kit for side brush	Electric connector 8/14 poles
Brush shaft with mixed STEEL - PPN rings
